

#MeetOurSTEMAmbassadors

We have so many amazing volunteers and we'd like you meet them!

About me		
Name:	Fatima Tuj Mehjabin	Photo: 
Location:	Sheffield	
Job/course title:	Bsc (Hons) Biomedical Science	
Organisation:	Sheffield Hallam University	
Education/career journey:		
<p>I am currently studying Biomedical Science and I am really enjoying the molecular biology aspects of the course such as genetics. I have always loved science especially Biology but the person who inspired me to follow a career in STEM is my mother as she supported my dream of doing Biomedical Science at university.</p>		
STEM Ambassador role:		
<p>I became a STEM Ambassador as I wanted to pass on my love for science to others and share about my experiences as a STEM student. As a student, I plan to go to schools and school fairs to encourage students to try out science in the future. By being a STEM Ambassador, I am reminded of the love I have for biomedical science and I hope it inspires the young generation to consider a career in STEM.</p>		

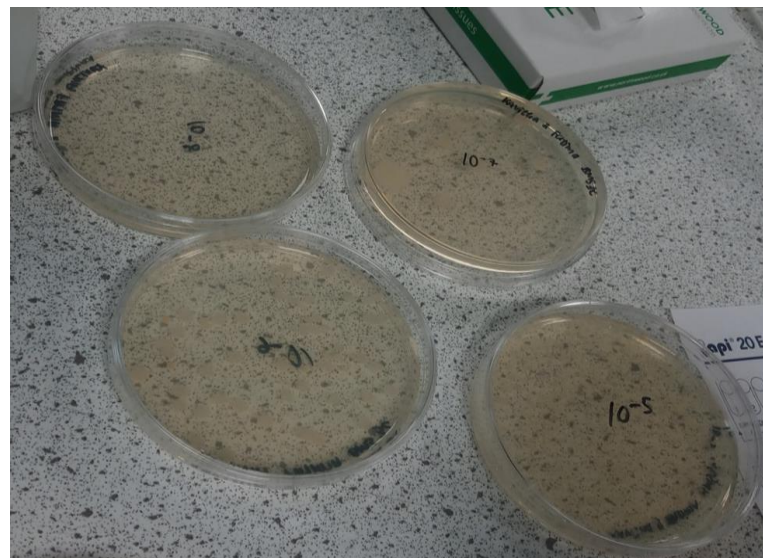

Nice to get to know you!

Student challenge:

Identify the instrument below:

What kind of experiments are these plates used in?

Nice to get to know you!
