

DEBP are proud to be a partner of [STEM Learning UK](#) as managers of the STEM Ambassador Hub for North Midlands (Derbyshire and Nottinghamshire), South and East Yorkshire and the STEM Enrichment Programme for Yorkshire and Humber.

STEM AMBASSADORS PROGRAMME

STEM Ambassadors volunteer their time and expertise to promote STEM to young people in original, creative, practical, and engaging ways. We look after almost 3000 brilliant and inspiring volunteers supporting the STEM curriculum in schools across all key stages, raising awareness of STEM careers and supporting STEM activities both in the classroom and the community. STEM Ambassadors cross all ages and backgrounds, representing a vast spectrum of different employers.

To get you started why not have a read of the [STEM Ambassador Teacher Handbook](#) and our [top tips and tools guide](#) to maximise your STEM Ambassador requests and [first activity request tips](#).

We also offer networking opportunities, STEM training for teachers and a range of free STEM activity resources which can be borrowed from us for use in the classroom and to support extra-curricular activities such as STEM clubs and enrichment days.

For further information about how we can support you, please visit our [website](#) or contact us as at ambassadors@debp.org.

ENRICHMENT PROGRAMMES

We are part of the national network supporting STEM enrichment within UK schools, bringing together the complementary strengths of everyone involved in the National STEM Learning Network. Our role is to utilise local expertise to provide a programme of enrichment support and opportunities to schools, colleges, students, and employers to enhance young people's STEM education.

The [Enrichment programmes](#) support young people to develop their science capital and essential STEM skills. The aims of these programmes are for all young people to have multiple, regular opportunities to engage with meaningful and impactful STEM enrichment activities. The three enrichment programmes we offer are:

- ESERO-UK
- Nuffield Research Placements
- STEM Clubs

ESERO-UK

The aim of [ESERO-UK](#) is to support the space sector by inspiring more young people, particularly those from under-represented groups, to pursue space-related studies and careers post-16. We aim to provide young people with inspirational activities and opportunities inside and outside formal lessons to increase their STEM aspiration by working with Space Champions.

Would you like to find out about the Space CPD we can offer you as a school/college or a Trust? Do you have an interest in the space sector and would like to know more about the different opportunities on offer?

NUFFIELD RESEARCH PLACEMENTS

[Nuffield Research Placements \(NRPs\)](#) are engaging, real-life research or development projects, where talented Year 12 (or equivalent) students are placed at the heart of a UK host organisation. This programme focuses on providing placements for young people from disadvantaged backgrounds, whether from low-income households, families with no history of higher education or those in care, providing this opportunity to over 1,000 students each year across the UK.

We offer bespoke support for schools and colleges so that your students are given high quality, individual advice and guidance about the application, selection process and placement.

Do you have students in your school/college who would be interested in this programme? Would like to know more about NRP and how we can support you and them?

STEM CLUBS

At least three quarters of UK schools have one or more thriving STEM Clubs, but we want it to be more. More STEM clubs in schools will increase the opportunities available to young people to participate in a high impact STEM activity during the course of their education.

[STEM Clubs](#) are an important way to ignite new interest and to raise attainment in STEM subjects through imaginative and inventive teaching methods.

Would you like to set up a STEM Club in your school/college and would like some support to do so? Do you already have an established STEM Club and would like to find out more about our new STEM Recognition scheme?

We would love to hear from you if you are interested in any of the Enrichment programmes. Please contact us at enrichment-partnership-yorkshire@debp.org
